

In today's world,

we struggle with an idealized image of success: driven to being "perfect" in the eyes of the world. As Christian women, our inability to measure up becomes a roadblock to us living a **Fearless & Free** life, loved by God. We have to "have it together" so it's challenging to reveal our real life struggles which puts us at a disadvantage in our faith.

Our guest speaker

Elise Neel is familiar with our struggles as Christian women. Elise is the CEO of MapQuest and the VP of Verizon Location Services. She will share first-hand about her own deeply personal struggles and will communicate **a message of hope and freedom** in Christ for all women that don't "have it all together."

We invite you

to break down these walls and pursue a vibrant relationship with Jesus Christ at the 2018 Christian Women's Conference:
